Business Broadband Service
IPv6 Configuration Guide
[Macintosh]

(Version 2.0)

HKBN Enterprise Solutions is the brand / trading name of HKBN Enterprise Solutions Limited and/or HKBN Enterprise Solutions HK Limited

Macintosh

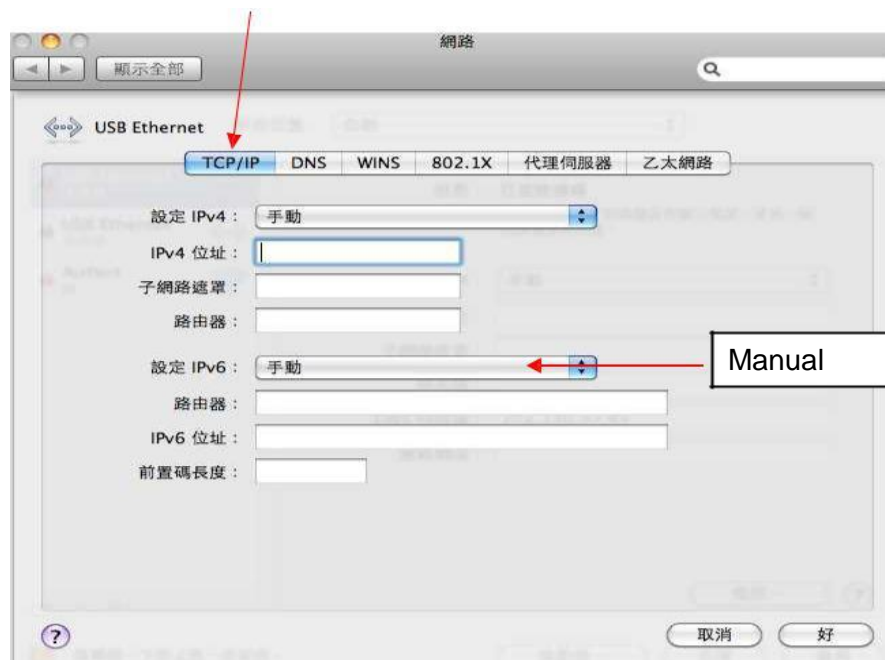

1. From the task bar, click **System Preference** and select **Network**

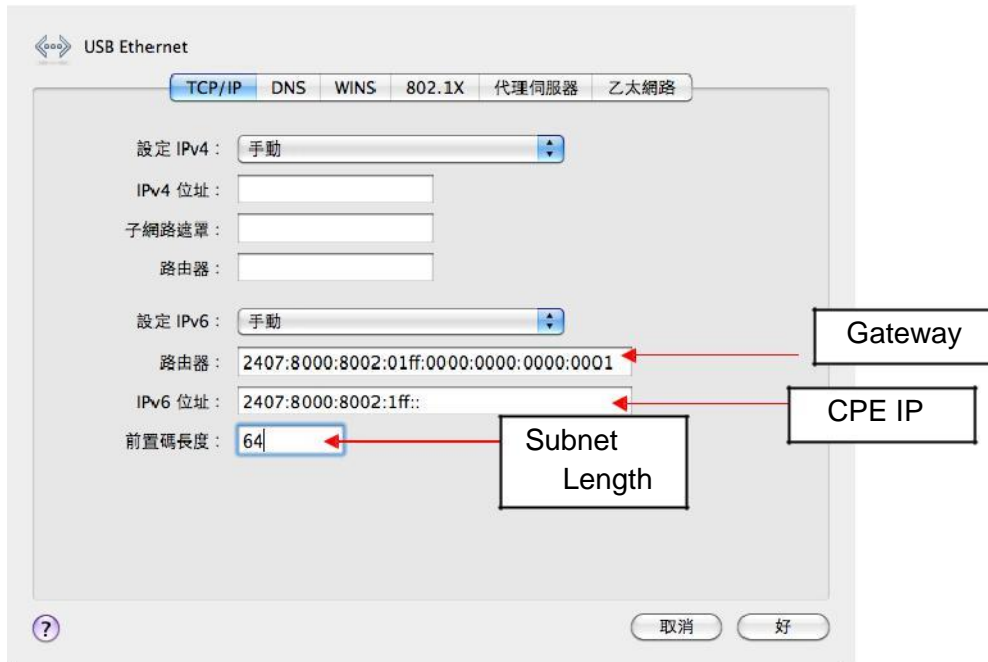

2. Select “Advance”

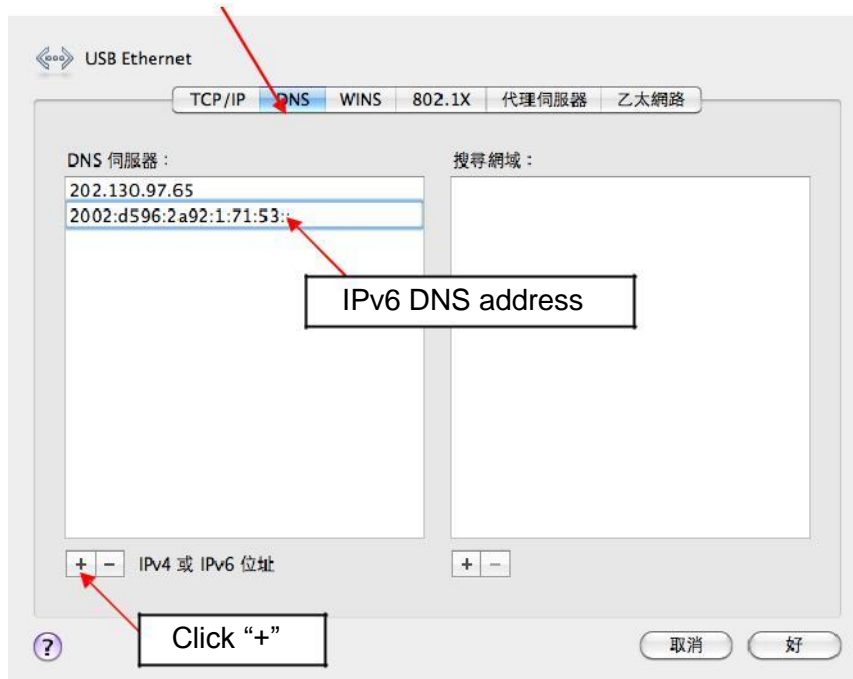

3. Select “TCP/IP” tab page, select “Manual” for setting IPv6

4. Type in “Gateway”, “IPv6 Address” and “Subnet length” for setting IPv6

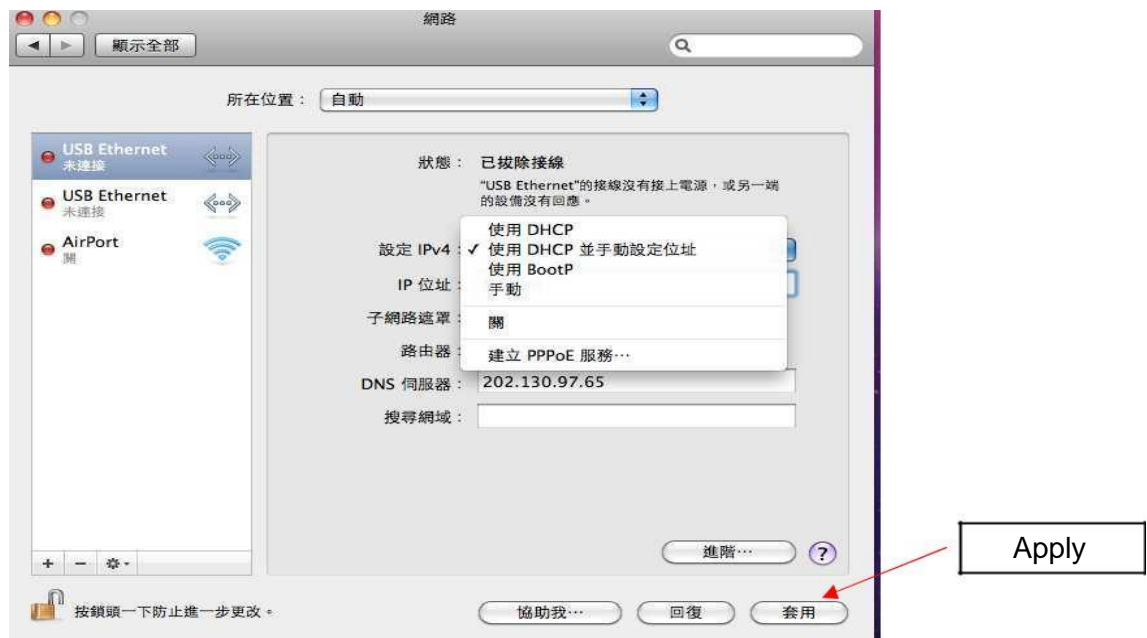

5. Select “DNS” Tabpage, Click “+” and type in IPv6 Preferred DNS server address

6. Click “OK” button

7. Click “Apply” button to finish the set up procedures

- Test the connection, open the Internet Explorer, type the website which has IPv6 address, e.g. www.gov.hk

- Check the connection and the IPv6 address: Open the command prompt Type “netstat” and will see the IPv6 address for www.gov.hk

```
