Cloud Video service is an advanced, state-of-the-art unified communications service. Apart from voice services which consists of full-featured IP telephony and performs all the functions of a traditional telephone with the added advantages of Mobility Apps S, Sim-Ring, Extension Mobility, Remote Extension, Presence Communicator S and Cloud Communicator S (softphone), it also provides multiple parties video call conference. It helps to enhance the operational efficiency of your business and assures that your colleagues can always stay in touch with your business partners anytime, anywhere.

Mobility Apps S is an innovative communications application for your Android device and turns it into a fully featured IP telephone. It allows you to display your Cloud Video number as well as multiple parties video calls when making outbound calls to your business partner, no matter where you are.

Important Note:

Your iPad device must be

- *operated with Apple iOS 4.2, 4.3 or 5.0*
- *operated in a Wifi/4G/3G environment connected with Internet without any blocking of port '80' & '443'.*

1. Download Mobility Apps S

2. Enter the name, number, or URI address (e.g. 34567890@cloudvideo.com.hk) of the recipient.

3. Tap the call button  .

Cloud Video - Mobility Apps S for iPad

- If the call is dialed to a phone without video, the call will be changed to a normal voice call.
- If you wish to dial out a call, which has been made previously, you can make use of following procedures accordingly.
 - i. Select **Recents** in the navigation area

- ii. Select a history to dial a call

Note: When you wish to make outbound call or waiting for an incoming call, please closely monitor the WIFI/4G/3G connectivity by means of the phone status displayed in the top of the display.

For incoming call history, external call records are showing 8-digits number. It is not recommended use call history to call back directly. Please use Keypad to enter "9" with 8-digits telephone number to make a call.

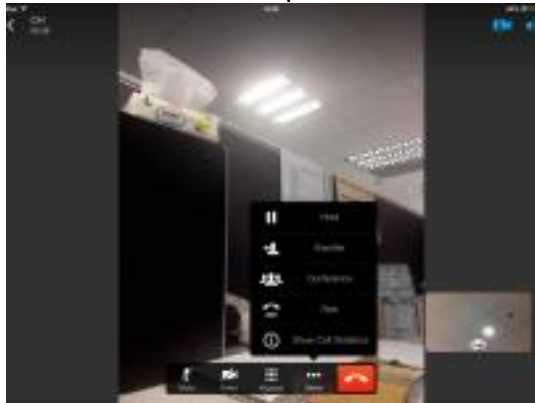

Icons	Description
 37920432 Available	The phone is connected to the network. It is available to place and receive calls.
