

Dark Fibre

Optical fibre connectivity with infinite expandability

HKBN Dark Fibre provides all the flexibility and scalability you need to support bandwidth-intensive business applications. Flexibly select and deploy your choice of network technologies through HKBN Dark Fibre infrastructure, and build high capacity metro networks that operate at extremely low latency within microseconds. Retain total control over your network design while simultaneously leveraging HKBN's fibre expertise.

Features & Advantages

- **Diversity Routing**

Extensive self-built and self-managed network of HKBN enables diversity routing to ensure continuous data transmission

- **Infinite Capacity for Future Expansion**

Optical fibre empowers virtually unlimited bandwidth for future upgrade. New technology adaptation is simple and easy

- **The Highest Level of Security**

Point-to-point dedicated fibre network delivers the ultimate in security to connect your business's mission-critical sites

- **Fast Deployment**

Pre-provisioned fibre network between major Data Centres in Hong Kong ensure fast deployment of customised routing

- **Carrier-grade Service Support**

Dedicated 24x7 Network Operations Centre (NOC) and field services provide round-the-clock technical support and fast-recovery

- **Low Latency Connection**

Benchmarked minimal latency between data centre facilities within microseconds
