## 1. MobileOffice Overview

MobileOffice is a simple application that enables you to make and receive calls (non-VoIP) using your business identity over your Smartphone. Once installed, you can perform the following functions through the MobileOffice app:

- Make and receive calls over the mobile network presenting your office phone number
- Access call history for all call activity linked to your business line (mobile and fixed)
- Search for contacts in corporate directory in addition to your local phone directory
- Set up call features such as Call Forwarding, Do Not Disturb, Hide Number, Mobility, etc.
- Alleviate roaming charges by “Office No (Call Back)” feature when you are travelling outside of your calling area

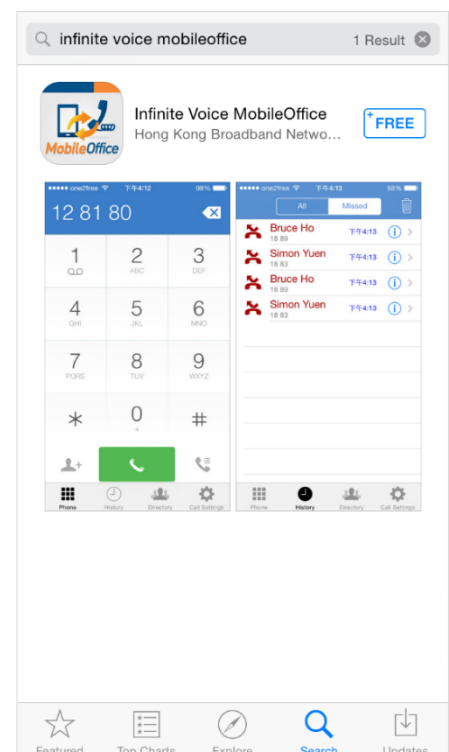

### *Tips:*

- A data connection is required for your mobile device to set up call features, access call history, search contacts and set up outbound calls.
- For having phone conversations, only GSM network (calling minutes) is required without any data usage.

## 2. Download MobileOffice App

The latest iOS version of MobileOffice for mobile devices are available on App Store (Currently support in English only)

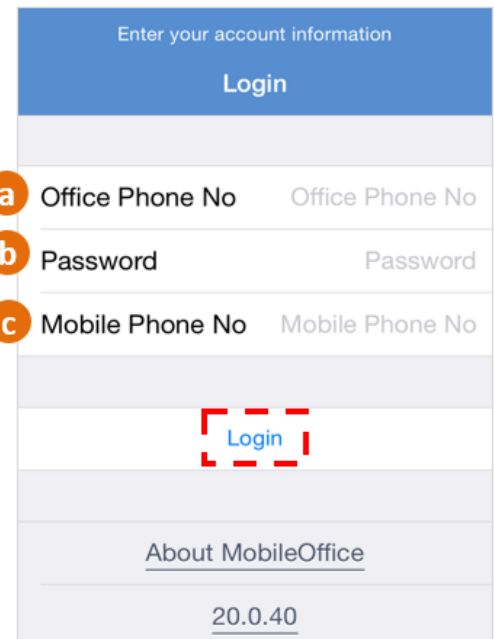

1. Search the keyword “**Infinite Voice MobileOffice**” from the App Store on your iPhone
2. Select and tap “**FREE**” to install

### 3. Login to your account

1. Once installed, tap the icon on your iPhone screen to launch the app
2. Accept the End-User License Agreement
3. The Login page will be shown automatically. Enter the following information:
  - a. **Office Phone No**: Your Infinite Voice phone number (e.g. 39998000)
  - b. **Password**: Please refer to service notification email for your password details (please change your password in <https://iv.hkbnes.net/user> for enhanced security)
  - c. **Mobile Phone No**: Your existing mobile phone number **MUST** be entered. Otherwise, the function of Mobility features will be affected.
4. Click "**Login**"

Enter your account information

About MobileOffice

20.0.40

#### *Tips:*

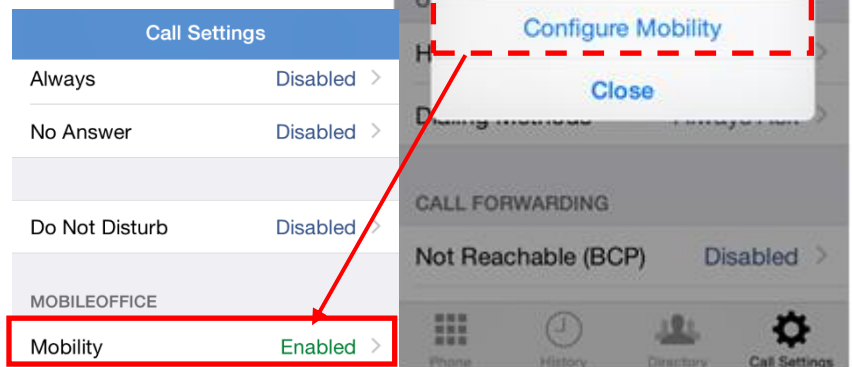

- *Password rule: (1) At least 8 digits; (2) Contains at least 1 number; (3) Must not be the same as Office Phone No.*

#### 4. Auto configure Mobility

There are a number of cool things you will be able to do once the features are set up, let's get started!

First, the system will prompt you to automatically configure mobility feature once you login. You are highly recommended to select "**Configure Mobility**" for feature activation.

Once selected, the "Mobility" feature will be set "**Enabled**"

#### 5. Set up Mobility features

If you don't choose to auto configure, you can also set the Mobility features manually. To set up the Mobility features:

Go to "Call Settings" page, tab "Mobility" button.

1. Turn "Active" to "**On**"
2. Select "Phones to Ring" option:
  - **Office Phone** – ring office phone only if called to your office phone number
  - **Mobile Phone No** – ring mobile phone only if called to your office phone number
  - **Both** – ring both office and mobile phones if called to your office phone number (Recommended to select this option)
3. Press "Save" to activate the feature

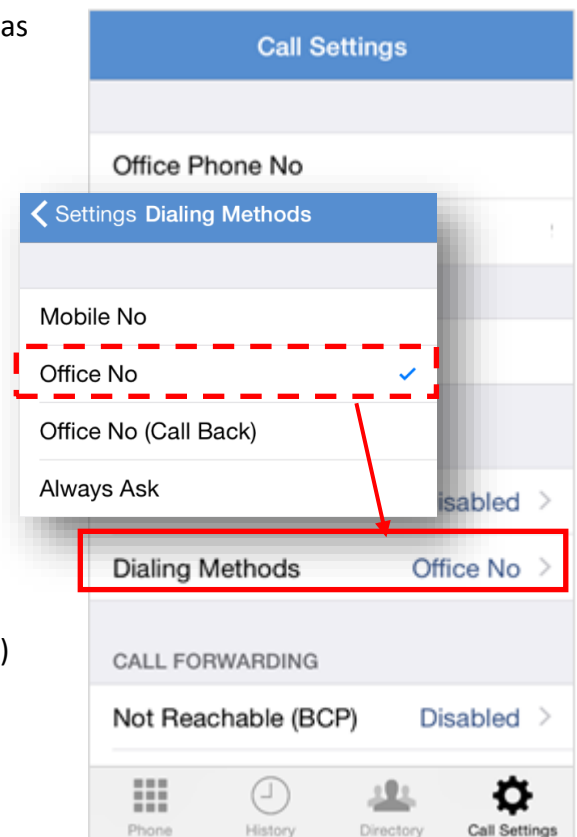

## 6. Placing a call

Before making calls, you can select which number to present as your identity.

Go to “Call Settings” page and tab “Dialing Methods” button.

Four (4) Dialing Methods are available:

1. **Mobile No** – select this option to show your mobile phone number
2. **Office No** – select this option to show your office phone number (Recommended to select this option)
3. **Office No (Call Back)** – select this option to show your office phone number (Recommend to use overseas)
4. **Always Ask** – select this option to prompt the dialing methods menu for every outgoing call

## 7. Placing a call with Office Number

You can now place calls from your local mobile network by using your business identity (office phone number).

1. Select “Phone” page
2. Enter phone number you wish to call (e.g. 39991000 or extension dial 1000)
3. Tap  button
4. Your office number will be used as caller number display

## 8. Call Voicemail

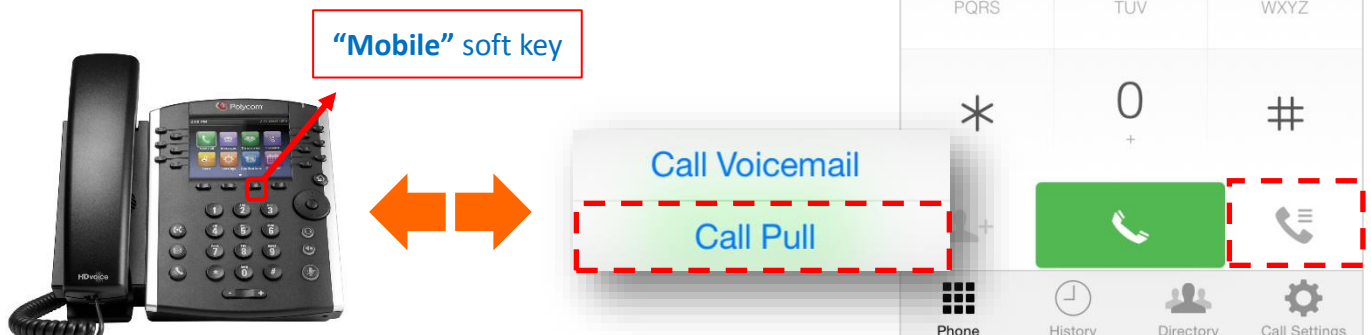

1. Select "Phone" page
2. Tap  button and select "**Call Voicemail**"
3. Follow the voice prompt to check voicemail on your office number

## 9. Call Pull

### between Office Phone & Mobile Phone

1. Select "Phone" page
2. When you are on a call with your office phone
3. Tap  button and select "**Call Pull**" to pull the call seamlessly from your office phone to mobile phone
4. To pull back the call to your office phone, just press the "**Mobile**" soft key on your office phone screen and the call will be pulled back seamlessly

## 10. Call Forwarding

### 10.1 Call Forwarding Always

Once activated, all of your calls will be automatically forwarded to your designated phone number directly.

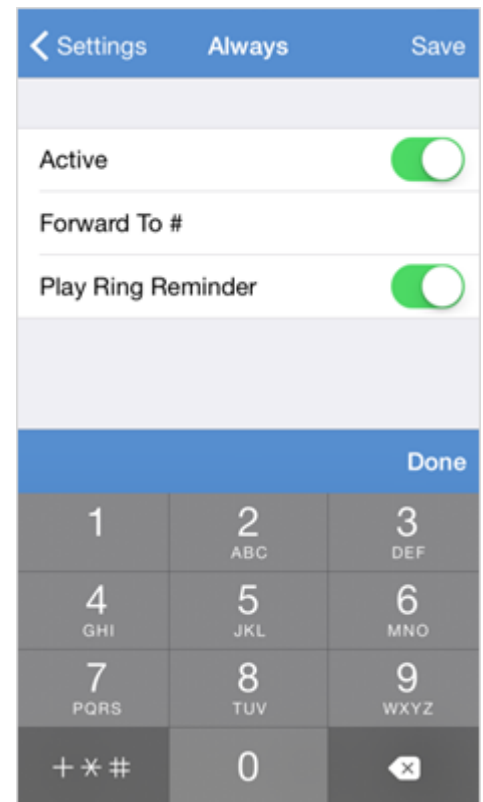

Go to “Call Settings” page.

#### Activation:

1. Turn “Active” to “On”
2. Enter designated phone number in “Forward To #”
3. Select “Play Ring Reminder” to alert you in your office phone when a call is forwarded
4. Press “Save” to activate the feature

#### Deactivation:

Turn “Active” to “Off” and press “Save” to deactivate the feature

### 10.2 Call Forwarding When No Answer

Once activated, your calls will be automatically forwarded to your designated phone number when you do not answer your office phone after a certain number of rings.

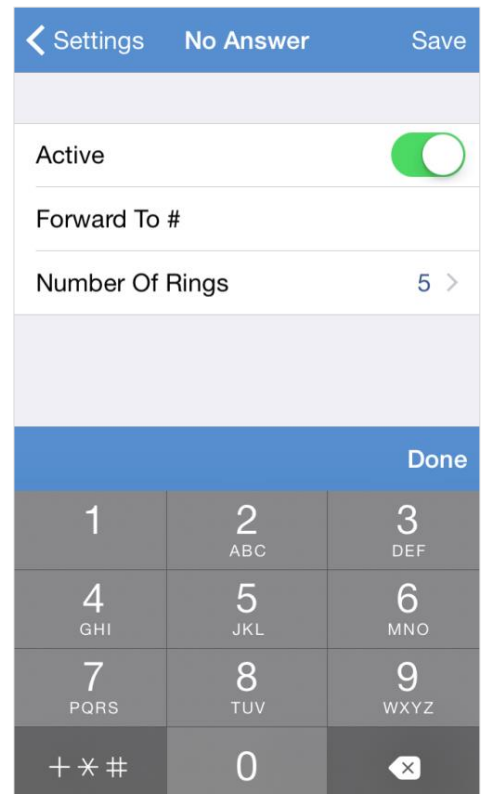

Go to “Call Settings” page.

#### Activation:

1. Turn “Active” to “On”
2. Enter designated phone number in “Forward To #”
3. Select your preferred “Number Of Rings” (The defaulted “Number of Rings” is 5 and the duration of ring is around 6 seconds per ring)
4. Press “Save” to activate the feature

#### Deactivation:

Turn “Active” to “Off” and press “Save” to deactivate the feature

### 10.3 Call Forwarding When Busy

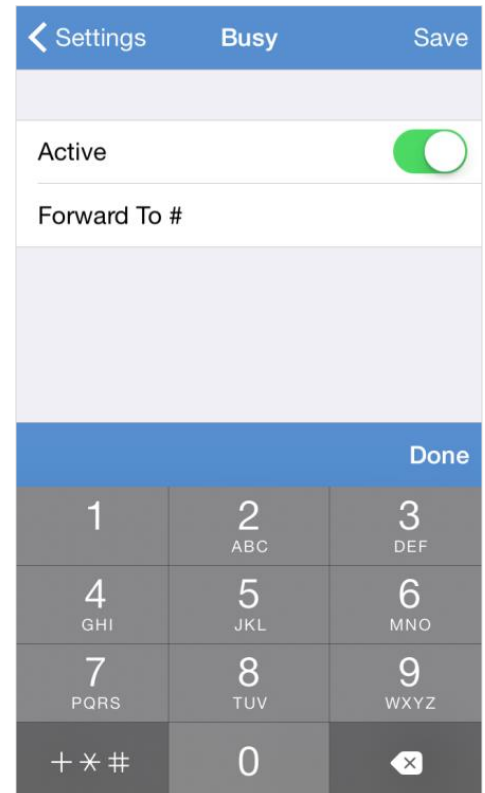

Once activated, your calls will be automatically forwarded to your designated phone number when your office phone is busy.  
Go to “Call Settings” page.

#### Activation:

1. Turn “Active” to “On”
2. Enter designated phone number in “Forward To #”
3. Press “Save” to activate the feature

#### Deactivation:

Turn “Active” to “Off” and press “Save” to deactivate the feature

### 10.4 BCP (Business Continuity Plan)

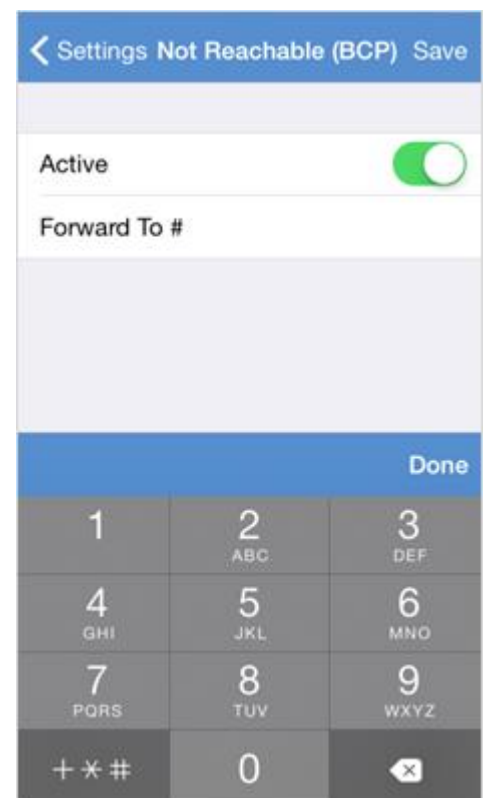

Once activated, your calls will be automatically forwarded to your designated phone number when your office phone is unreachable due to power outage, cable disconnection, equipment malfunction, etc.  
Go to “Call Settings” page.

#### Activation:

1. Turn “Active” to “On”
2. Enter designated phone number in “Forward To #”
3. Press “Save” to activate the feature

#### Deactivation:

Turn “Active” to “Off” and press “Save” to deactivate the feature

## 11. Do Not Disturb

Once activated, your calls will be automatically forwarded to your voicemail (if any); otherwise the caller hears a busy tone.

Go to “Call Settings” page.

### Activation:

1. Turn “Active” to “**On**”
2. Select “**Play Ring Reminder**” to alert you in your office phone when a call is forwarded
3. Press “**Save**” to activate the feature

### Deactivation:

Turn “Active” to “**Off**” and press “**Save**” to deactivate the feature

## 12. Hide Number

Once activated, you can prevent your office phone number from being displayed when calling other numbers.

Go to “Call Settings” page.

### Activation:

Turn “Active” to “**On**” and press “**Save**” to activate the feature

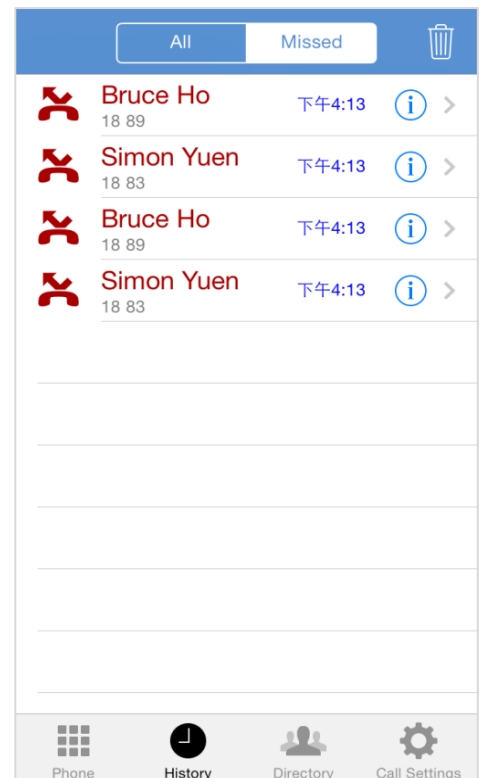

### Deactivation:

Turn “Active” to “**Off**” and press “**Save**” to deactivate the feature

### 13. Browsing Call History

1. Select “History” page to view your call history (maximum 60 records) on your office phone
2. You can tab “**All**”, “**Missed**” to sort out call history for all calls and missed calls

### 14. Searching Corporate or Local Directory

Select “Directory” page and enter keywords (e.g. name) in the “Search” field

You can search the directory by:

- **All** - search all contacts in both Corporate Directory and Local Smartphone directory
- **Directory** - search all contacts in Corporate directory only
- **Local** - search all contacts in your Local Smartphone directory

## 15. Other Mobility features

1. The “**Answer Confirmation**” option will prompt you to enter any digit on your mobile phone’s keypad to accept an incoming call (Recommended to select this if you wish to distinguish an incoming call from mobile network or fixed line network)

-Press “**Save**” to activate the feature

2. The “**Enable for Call Back**” option is required to be activated when you use “**Office No (Call Back)**” feature in overseas.

## 16. Call transfer & three-way conference

### Call Transfer:

1. While on the call with a contact, press “**##**” on the keypad [this will act as flash key]
2. Enter the phone number you wish to transfer, followed by a “**#**” key [this will act as dial out]
3. When the call is successfully established, please hang up
4. Your call is transferred to the selected contact

### Initiate Three-Way Conference:

1. While on a call with a contact, press “**##**” on the keypad [this will act as flash key]
2. Enter the phone number you wish to add, followed by a “**#**” key [this will act as dial out]
3. When the call is successfully established, press “**##**” again to connect all parties
4. The third party joins to the conference automatically when he/she answers the call

### Tips:

- The “**Call Transfer**” (In “**Call Settings**” page and tab “**Mobility**” button), option must be “**On**” to perform the above functions.
- Call waiting on your mobile phone will be disabled if this feature is activated.

## 17. Calling from overseas to HK (1)

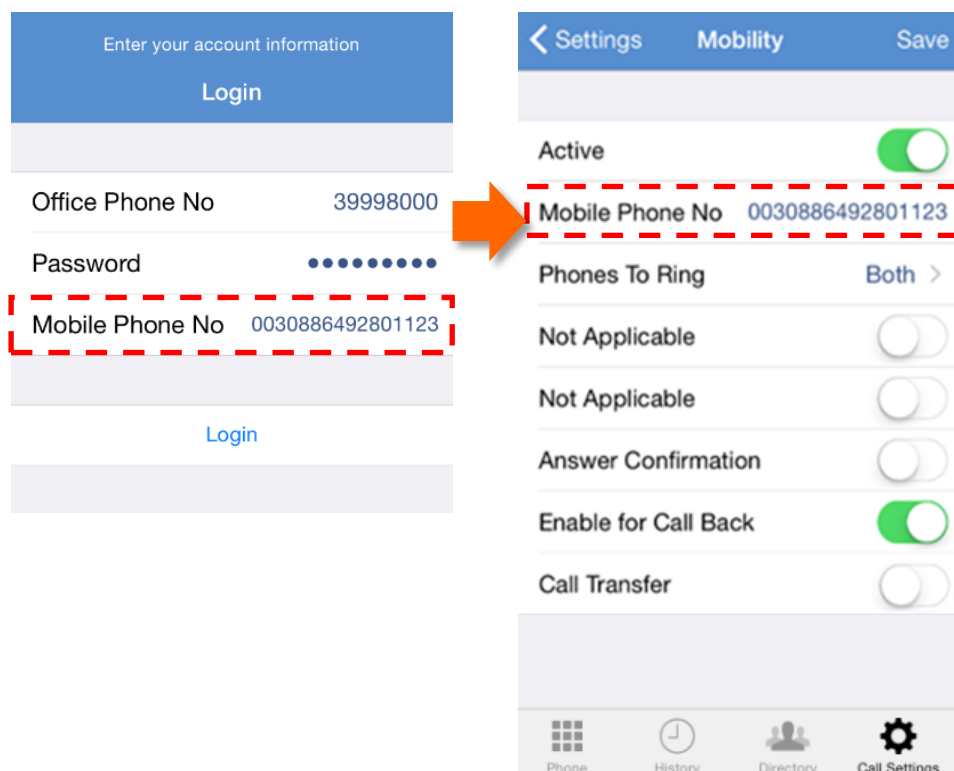

Activate the “**Enable for Call Back**” feature in order to use “**Office No (Call Back)**” overseas

Set up your overseas mobile number in the app:

1. Select “Call Settings” page, tab “**Logout**” to logout the app
2. On Login page, enter your “**Office Phone No**” and “**Password**”
3. Enter your overseas number (e.g. 0030 + country code + area code + overseas mobile no.) in “**Mobile Phone No**” then tab “**Login**”
4. Go to “Call Settings” page and tab “Mobility” button
5. Enter your overseas number again in “**Mobile Phone No**” text box
6. Press “**Save**” to set up the overseas number

### Tips:

- You must have a local SIM card with voice and data connection in order to make and receive calls with your office number.
- For overseas mobile number, please enter your “Registered HKBN IDD Dialing Code (0030/1666) + Country Code + Area Code + Overseas Mobile Number”.

## 18. Calling from overseas to HK (2)

You can now make calls using the “**Office No (Call Back)**” feature:

1. Select “**Phone**” page
2. Enter the Hong Kong phone number you wish to call
3. Tap  button
4. Tap “**Office No (Call Back)**” button
5. Your office number will be used as caller number display
6. Select “**Answer**” when your phone rings
7. The call will be routed to your called number by using your office number as caller number display

### Tips:

- Your call will be charged at your company IDD rate (call initiated from office phone number to Hong Kong mobile phone number) based on your registered 0030 or 1666 IDD rate table.

## 19. Calling from overseas to other overseas countries

Activate the “**Enable for Call Back**” feature in order to use “**Office No (Call Back)**” to call overseas.

1. Select “**Phone**” page
2. Enter the overseas phone number (e.g. 0030 + country code + area code + overseas mobile no.) you wish to call
3. Tap  button
4. Tap “**Office No (Call Back)**” button
5. Your office number will be used as caller number display
6. Select “**Answer**” when your phone rings
7. The call will be routed to your called number by using your office number as caller number display

### Tips:

- Your call will be charged at your company IDD rate based on your registered 0030 or 1666 IDD rate table:
  - First charge: From office phone number to overseas mobile phone number
  - Second charge : From office phone number to your destination overseas phone number

## 20. Error Message

- One office number can only match ONE mobile number; otherwise, the following error will occur.

~ END ~
