1. Overview

NetTalk Internet Phone is a Windows-based PC application that provides voice communication between PC and Public Switched Telephone Network (PSTN). The NetTalk Internet Phone can be used anywhere e.g. home, office, Wi-Fi hotspot, hotel, etc. once it is connected to a PC. After login, users can make calls with a Hong Kong fixed line telephone number anywhere with a PC and Broadband Internet connection.

By means of advanced technology, NetTalk Internet Phone can adapt to different network environment, it supports working behind a NAT, such as broadband router.

3. Login to NetTalk Internet Phone

1

After plugging-in the USB device (MEMORYphone) into PC, the NetTalk Internet Phone will start automatically. Simply press the “Enter” key of your keyboard or click “OK” to start using your NetTalk Internet Phone Service.

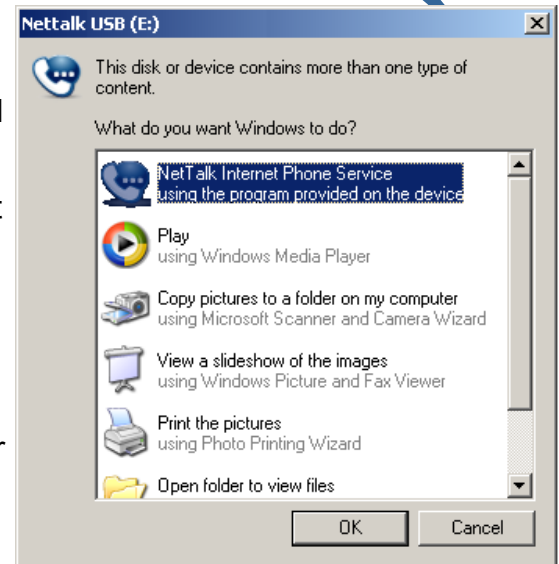

For Microsoft® Windows® 7 users:

After plugging-in the MEMORYphone into PC, select “Open folder to view files”, then opens the “NetTalk” folder

 and double-clicks the NetTalk client  to start using your NetTalk Internet Phone Service.

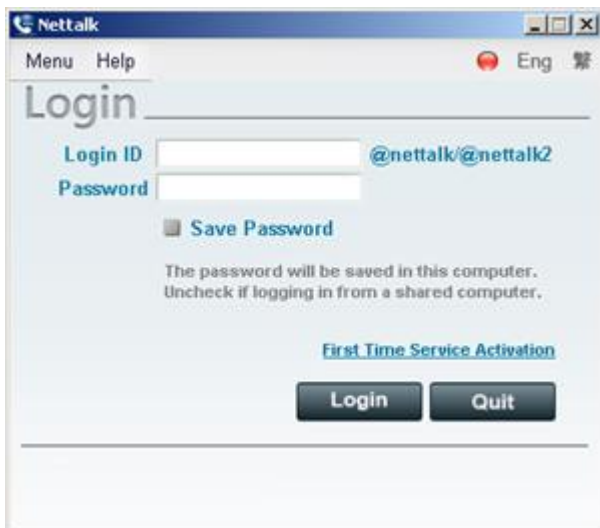

For NetTalk Internet Phone (Service only) users:

Double click the NetTalk icon to start using your NetTalk Internet Phone Service.

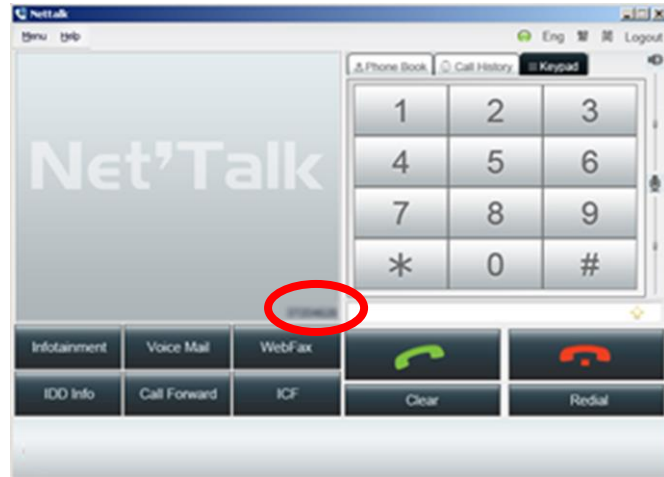

2

Enter Login ID and Password, and then click “Login”. Click “Save Password” to store the entered password in client.

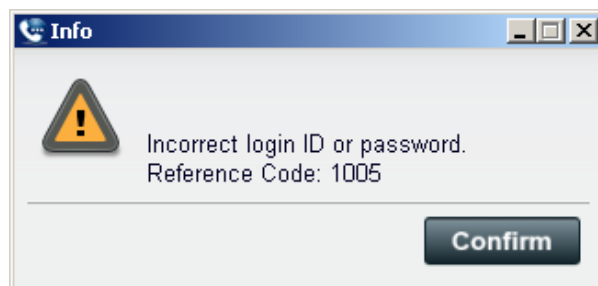

Remarks: For MEMORYphone, please click “First Time Service Activation” to activate the service before the first-time login. For NetTalk Internet Phone (Service only) users, First Time Service Activation is not required.

3

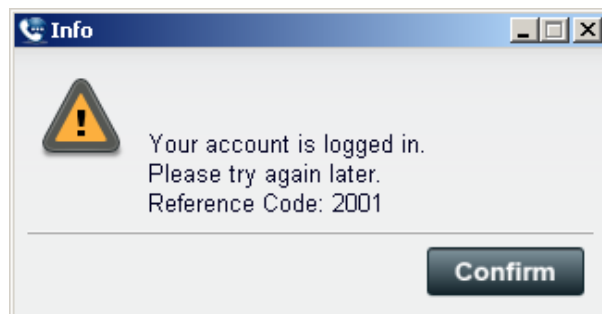

After login, your telephone number will be displayed on the screen.

!

If "Incorrect Login ID or password" is displayed, please re-input Login ID and Password and click "Login" again.

If "Log in failed. Please try again later" is displayed, that means this login is used in other devices, please check and try to login again.

4. Basic Calling Operation

4.1 To make outgoing calls

Make local calls to Hong Kong

1

Dial the telephone number on the Keypad (no need to enter prefix “852”).
Or, key in telephone number in the bar

(No need to enter prefixes “852”).

2

Click 
to make call.

3

Click 
to hang up.

Make IDD calls*

1

Dial the telephone number on the Keypad: “009” + Country code + Area code + Telephone number

2

Click 
to make call.

3

Click 
to hang up.

* To apply for IDD 009, please register during NetTalk Internet Phone Service activation or registration. You may also click  or call our Customer Service Hotline at 128 180 for registration.

4.2 To answer incoming calls

1

A window will be shown to indicate an incoming call.

2

Click

to answer the call.

3

Click

to hang up.

4.3 Call Features

Caller Number Display

It enables you to recognize the caller before answering the call. Even when your phone has been unanswered or no messages has been left in your voice mail, the caller's number and time of call are still recorded for re-dialing convenience.

Caller Number Display Per Call Blocking

You can choose not to show your telephone number to the called party for each outgoing call.

- Dial "1" "3" "3" + Telephone Number then click 

Call Conference

Conference calling facilitates the communication between various parties. It enables you to add a third party to an existing call anytime you wish.

- Dial the telephone number, click 
- Connected, Dial the 2nd telephone number, click 
- Connected, click " Conference"
- Begin the conference conversation

Call Waiting

It enables you to answer another incoming call while you are engaged on the line. It gives you the convenience of switching back and forth between two calls. If you prefer to disregard the new incoming call, you can cancel the Call Waiting feature on a per call basis.

Answer the waiting call

- Inform the conversing party that you are putting him/her on hold
- Click 
- Begin the conversation with the Call Waiting party

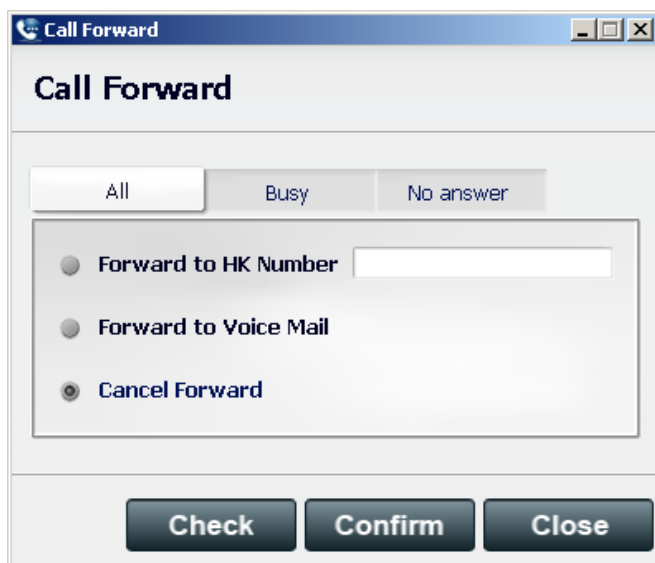

Return to the original party or alternate between two calls

- Select the original party
- Click  whenever you wish to resume the hold call

Call Forward

Use Call Forward to direct your calls to any telephone numbers or Voice Mail.

All Call Forward

- Check the box to select the Forward type (All, Busy or No Answer)
- Enter the telephone number
- Click "Confirm" to Forward

And you could:

- Check the box of "Cancel Forward" to cancel Call Forward
- Click "Check" to view existing setting

- Press the "No Answer
- Check the box to select Forward type
- Enter the telephone number
- Click "Confirm"
- Check the box of "Cancel Forward" to cancel Call Forward

Call Forward

Busy Call Forward

The screenshot shows a window titled 'Call Forward' with a standard Windows-style title bar. Inside the window, there are three tabs: 'All', 'Busy', and 'No answer'. The 'Busy' tab is currently selected. Below the tabs, there are three radio button options: 'Forward to HK Number' (unselected), 'Forward to Voice Mail' (selected), and 'Cancel Forward' (unselected). The 'Forward to HK Number' option has an adjacent text input field. At the bottom of the window, there are three buttons: 'Check', 'Confirm', and 'Close'.

No Answer Call Forward

The screenshot shows a window titled 'Call Forward' with a standard Windows-style title bar. Inside the window, there are three tabs: 'All', 'Busy', and 'No answer'. The 'No answer' tab is currently selected. Below the tabs, there are three radio button options: 'Forward to HK Number' (selected), 'Forward to Voice Mail' (unselected), and 'Cancel Forward' (unselected). The 'Forward to HK Number' option has an adjacent text input field. At the bottom of the window, there are three buttons: 'Check', 'Confirm', and 'Close'.

Block-the-blocker

With Block-the-blocker, your telephone will not ring and disturb you in case of anonymous calls. Instead, the rejected call will be routed to an announcement advising the caller that you do not wish to receive anonymous calls.

Activate Block-the-blocker
